

I have tried to keep up on the voom satellite sale to Dish. I have read that several deals have been denied before because you believe in competition. Well I believe if given 1/2 a chance Voom will give the other satellite services a run for their money. I have had both of the other services and neither compairs to Voom. With the future of High Definition TV ahead Voom can go nowhere but forward. Please consider denying the sale of Vooms Rainbow satellite to Dish and let Charles Dolan keep it so he can keep making Voom grow. Thank you, A very happy Voom customer.
